

I respectfully urge you to reject the NAB's petition 04-160. There is nothing like good old competition to make everyone better. Look no further than the cable company. Their service has improved as a result of competition. I greatly value XM and the traffic and weather. I think it makes for safer drivers. I drive many miles for my company and visit many of the cities that are covered by the traffic and weather. It is very good to know what is happening before I get there to avoid certain areas if there are alerts for there. Please reject the petition!!

Thank you,

George F. Holland
